

Norbu user activity log analysis

Xifan Wang

General information

Data Collection period → 2022-01-27 to 2022-03-28
60 days

Total users

83,298

Purchase counts

88

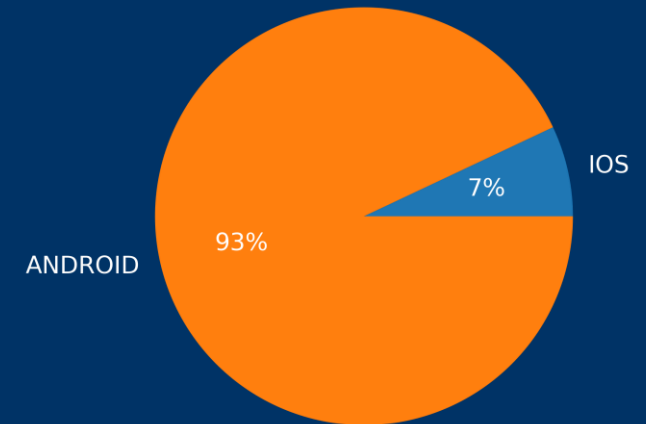

Revenue

1276 \$

Platforms

IOS / AND

Cohort retention rate

Users are grouped into cohorts with the date at which they opened the app for the first time.

At least 5 events each day to be considered as active.

The retention rate only applies to users who first launch the app in the data collection period.

2 days **0.36**

4 days **0.22**

7 days **0.16**

28 days **0.08**

The average retention rate is pretty normal, comparable to other meditation apps.

Cohort conversion

Users are grouped into cohorts. Purchase counts and conversion are plotted for each cohort.

User conversion is calculated as the ratio of purchased user counts with cohort user counts.

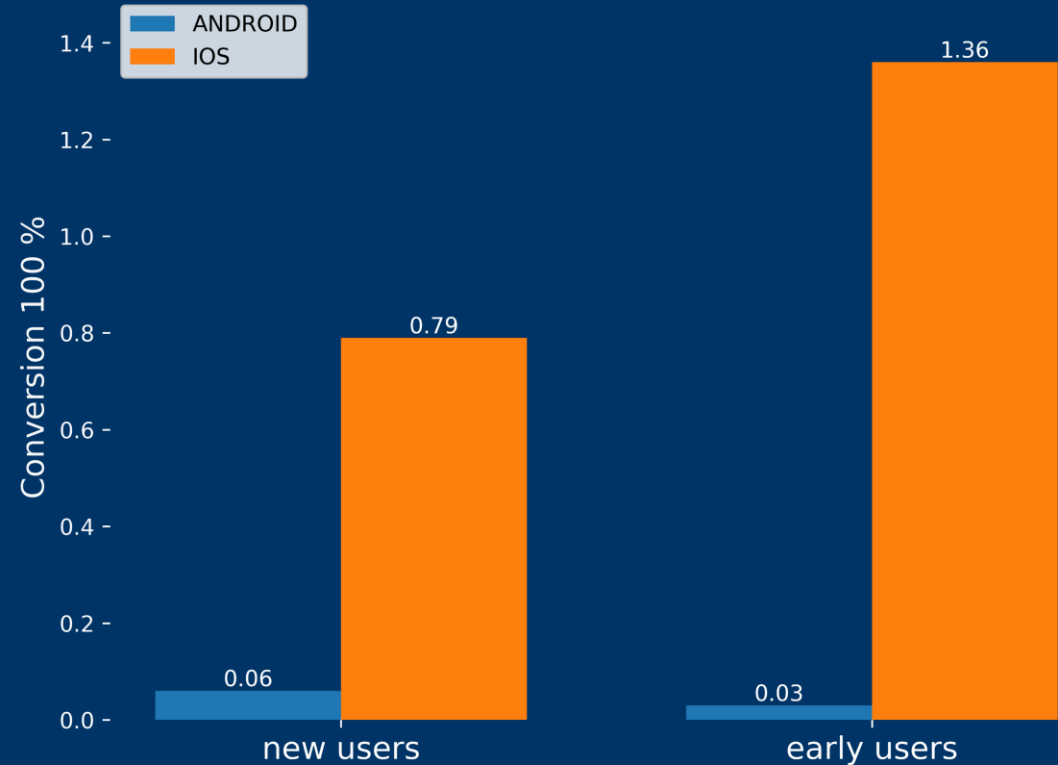

Conversion: platform

Subs in IOS
53

Subs in ANDROID
35

IOS conversion is **10** times more than
ANDROID conversion

Conversion: statistics

Days until subscription

- 45 users → 1 day
- 7 users → 7 days
- Rest → 1 month

Subscription preference

- 23 yearly subs
- 19 monthly subs
- 3 Lifelong subs

 - More than 50 % of users did not conduct any activity
 - Correlates to the unretained users
- Conversion
 - 75 % Subscription decision is made within 1 day
 - IOS users have significantly higher conversion rate than android users
- Subscription
 - Users prefer yearly subscription
 - Yearly subscription constitutes the majority of revenue
- Highly polarized unsubscribed users
 - Free fans
 - Users with less than 4 activities

Q & A

- What may increase retention rate?
 - **Clearer** and **simpler** interface, because more than **50 %** of unretained users did not perform any activity (training or game).
 - Introduce new users with some popular training immediately before they get confused and quit.
- What may increase conversion rate?
 - **Free fans** who have abnormally high activity counts. They are **dedicated** users, and shall be **targeted** for subscription marketing.
 - Increase the **coverage** of users from **IOS** platform. As IOS users have significantly higher conversion rate than Android users.
 - Promoting the **yearly subscription**, as it is being widely accepted by the subscribers.
- General advice
 - Focus on the first **2 days of user experience**, as it determines both the **retention** and **conversion**!
 - The analysis shows the 5 days plan is not widely accepted by users
